Deli-Wrap for Interleaving

4'x16' Pre-cut Polyethylene Sheeting

Duct Tape

Additional supplies: Box fans (2)

Instructions

Leak Diverters:

Hang diverters from a secure support with the included rubber straps.

Connect hose to diverter and drain into pail.

Additional pail is intended for transport to dispose of water.

The 18" funnel-shaped diverter is intended for localized leaks, while the 5'x5' diverter should be used on leaks spread over a larger area.

Polyethylene Sheeting:

4'x16' pre-cut sheeting is used to drape over stacks of shelves.

Secure sheeting in place with duct tape or binder clips.

Fans:

"Y" adaptor included in order to position fans to provide cross ventilation.

Transport of library materials:

If materials are to be transported to Preservation, interleave items with deli-wrap before placing in boxes.

Refills:

For refill supply requests, contact Brenna Campbell at brenna.campbell@princeton.edu or x1571.
